I am writing to express an interest in the Graphic Designer position.

I am a hybrid UI/UX Graphic Web Product Designer / Front-End Developer with 15+ years experience, currently exploring opportunities.

Fully proficient in responsive web design/development, front-end frameworks like Bootstrap and Tailwind, Adobe Creative Suite (Photoshop, Illustrator, XD), Figma, Visual Studio Code, Sketch, and front-end Wordpress (creating custom hand-coded Bootstrap-based WP themes from mocks, styling/maintaining WP sites, and also Divi, Elementor, Avada, and other page builders). Basic motion design experience with Adobe Animate, After Effects, and GSAP (Greensocks) as well as animation, basic video editing, and prototyping. Also experienced with print graphics -- including one-pagers, infographics, flyers, etc.

Comfortable working in dev environments using GitHub, Rails, JIRA, and similar tools. Also well-versed in hand coding emails or creating using tools like MailChimp and CampaignMonitor.

Skills Snapshot	**Design/Prototype Tools**	**Dev Tools**	**Misc Tools**
Web UI / Product Design	Figma	Visual Studio Code	Slack
Front-End Development	Adobe Photoshop Adobe	Bootstrap	MS Word
HTML/CSS/SCSS	Illustrator	Tailwind CSS	MS Excel
